

FOR IMMEDIATE RELEASE

Salient Management Company Expands Sales and Support Efforts into Mexico

Horseheads, N.Y., January, 2010 – Salient Management Company, a global leader in enterprise performance management solutions, today announced a new partnership with systems integration firm, ReSolt, to expand sales and support efforts in Mexico. ReSolt, based in Mexico City, will broaden Salient's ability to serve this growing market.

Known for expertise in integrating Business Intelligence (BI) solutions, ReSolt was a natural fit for Salient's suite of visual data-mining solutions. ReSolt had been a systems integrator of other BI solutions in the past, but had encountered limitations in the services provided. They had found that many BI solutions could not perform up to the speed and scalability that were needed. By partnering with Salient, ReSolt is now able to expand its capabilities to offer a new, more proactive approach for clients interested in leveraging business information to drive greater cost savings, revenue and margins.

The partnership with ReSolt firmly establishes Salient's presence in Mexico and provides localized support to current customers, while expanding the company's ability to drive sales efforts in Mexico. "We chose to partner with ReSolt based upon their proven expertise in delivering business intelligence solutions," said Guy Amisano, CEO of Salient Management Company. "We needed a partner in Mexico that we could trust and ReSolt has demonstrated a high quality of service and a talent for adapting to the needs of their customers."

According to Luis Almanza, Director of ReSolt, "We are excited to represent Salient Management Company in Mexico because we already believe in the strength of Salient's platform. The speed and ease of use of Salient's toolset helps us offer a more sophisticated visual data mining solution with greater capabilities than we could previously offer our customers."

About Salient Management Company

Salient Management Company offers business and government a new solution for efficient management. Drawing on diverse data from multiple sources, Salient technology measures how business activity creates value, quality, financial efficiency, productivity, while the user interface eliminates barriers to using this knowledge for continuous process improvement.

Salient's technology platform is a super scalable, in-memory, system for automated scoring of value added by business activity. The user interface provides a graphical toolbox for interactive, stream-of-thought data mining, visualization, and root cause analysis. Overall, the technology enables non-technical knowledge workers to evaluate process behaviors rapidly, eliminate waste, and continuously optimize outcomes.

Founded in 1986, Salient today serves more than 35,000 users in 53 countries. For more information, visit www.salient.com.

About ReSolt

Headquartered in Mexico City, Mexico, ReSolt helps firms leverage information technology to identify business opportunities or problems from all levels of business to ultimately increase profitability. ReSolt has recently launched its ReSolt Planning Module, a profitability planning system that generates plans and forecasts for complex business processes and large data volumes, built to accommodate high rates of utilization.
