

Salient Corporation Delivers the First Visual Data Mining Software for Forensic Investigation.

Salient Corporation is a performance management software developer. Founded in 1986, the firm created UXT[®], the first-of-its-kind technology for interactive interrogation of fraud, waste and abuse in very large transaction databases.

UXT has two parts: a super scalable multi-dimensional on line analytical processing (MOLAP) engine and a seamlessly integrated graphical user interface, the Salient Interactive Miner[®] (SIM[®]).

The UXT engine is differentiated in several ways:

- Bolts on multiple data sources through any ETL, including Salient's
- Scales to many billions of rows of un-aggregated transaction details
- Performs analytical operations in, typically, less than 3 seconds
- Has a unique associative data architecture that facilitates unrestricted investigation (by eliminating pre-calculations, pre-aggregates and data hierarchies)

The SIM GUI is a complete set of embedded tools for interactive drilling, sorting, segmenting, filtering and graphical analysis. It enables users to:

- Navigate complex data at speed-of-thought
- Interrogate transaction history from every possible perspective
- Instantly locate anomalies and outliers among individual persons, places and root cause events.

Salient solutions are used worldwide, with more than 300 corporate clients and 35,000 users in 53 countries. Its forensic solutions are presently deployed by 12 New York State counties for Medicaid fraud and abuse control and social services (welfare) management.

About Salient

Salient Corporation offers business and government a new solution for efficient management. Salient's technology platform is a super scalable in-memory OLAP system for activity based value scoring. Its user interface is a graphical toolbox for interactive, stream-of-thought data mining, visualization and root cause analysis. Overall, the technology enables non technical knowledge workers to evaluate process behaviors rapidly, eliminate waste and optimize outcomes continuously. visit www.salient.com.

“Today is a great day for Monroe County taxpayers. Salient's Muni-Minder software is a valuable new tool in our continuing battle against Medicaid fraud and abuse.”

Maggie Brooks
County Executive
Monroe County, New York

“Because the system is so flexible, it allows the operator to go off in directions that maybe weren't expected when the day began... It allows – even encourages – normal human inquisitiveness.”

Joe Mareane
Chief Fiscal Officer
Onondaga County, New York
