

Now There are 5 Ways to Leverage UXT® Data

Salient offers a variety of methods, including the Salient Interactive Miner™, Salient WebView™, customized dashboards, and more, to view and access intelligence on UXT®. Now you can use one or more of these solutions to create a customized solution that meets the needs of every user.

Salient Interactive Miner (SIM)

Installed on the user's machine, SIM is Salient's original desktop application. It offers the full suite of tools for interactive exploration, discovery and analysis. SIM connects directly to the UXT server via network connection.

The screenshot shows the Salient Interactive Miner (SIM) desktop application. The window title is 'Salient Corporation - 92 [Bottling]'. The interface includes a menu bar (File, Bookmarks, Analyses, Navigate, View, Options, Keys, Window, Help), a toolbar with various icons, and a 'Bookmarks' pane on the left. The main area displays a data table titled 'Comp - ME 12/1999 vs. YAG'. The table is filtered by 'Sales' and 'By:Region SouthEast Area'. The table has columns for 'Units', 'Net Revenue', 'Promo', and 'Net Price', each with 'This' and 'Last' sub-columns. The data is sorted by 'Units: This: DSC'. The table shows data for various regions, including SouthEast Area, SouthWest Area, East Area, NorthWest Area, Near West Area, and NorthEast Area, along with a 'Totals' row.

	Units		Net Revenue		Promo		Net Price	
	This	Last	This	Last	This	Last	This	Last
Total Region: 6								
SouthEast Area	69,324	64,719	622,179	591,660	55,549	49,969	8.97	9.14
SouthWest Area	65,067	60,886	553,981	532,807	52,430	48,255	8.51	8.75
East Area	58,896	55,051	464,027	453,769	50,847	45,404	7.88	8.24
NorthWest Area	56,410	50,748	501,003	466,834	44,376	38,492	8.88	9.20
Near West Area	20,919	21,148	216,440	204,491	7,252	8,236	10.35	9.67
NorthEast Area	289	295	2,143	1,997	176	216	7.41	6.77
Totals	270,905	252,847	2,359,773	2,251,558	210,630	190,572	8.71	8.90

Salient Interactive Miner's comprehensive tools and menus provide countless ways to analyze and interrogate the data.

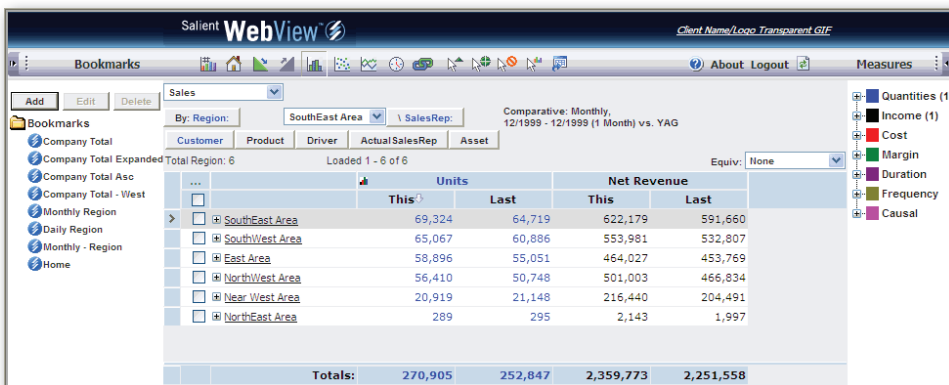

Salient WebView

Salient WebView provides access to UXT through a secure, interactive web application developed by Salient Corporation. Users simply log in to Salient WebView in a web browser, and connect to UXT over an Intranet or Internet connection. The only software required for users is Internet Explorer® or Firefox with Internet Explorer tab add-in.

Salient WebView allows users to drill down, navigate through UXT, create bookmarks, add measures, turn on graphs, and more using buttons and other simple controls. The look and feel is similar to Salient's acclaimed Interactive Miner (SIM) so users can easily transition back and forth when in the office or working remotely.

Salient WebView provides several interactive analysis tools with capabilities similar to Salient's famous Margin Minder user interface. These include drillable comparison, share, two way exception (scatter) and correlative time series modes. For a complete feature comparison, contact the Salient sales department.

Salient WebView requires Windows Internet Information Server™ (IIS).

The screenshot displays the Salient WebView application interface. At the top, there is a navigation bar with 'Bookmarks', 'About', and 'Logout' options. Below this, a 'Sales' dropdown menu is visible. The main content area shows a data table with columns for 'Units' and 'Net Revenue', each split into 'This' and 'Last' periods. The table is filtered by 'SouthEast Area' and 'SalesRep'. A 'Measures' panel on the right side of the interface lists various metrics like Quantities, Income, Cost, Margin, Duration, Frequency, and Causal. The bottom of the table shows a 'Totals' row with values: 270,905 (Units This), 252,847 (Units Last), 2,359,773 (Net Revenue This), and 2,251,558 (Net Revenue Last).

	Units		Net Revenue	
	This	Last	This	Last
SouthEast Area	69,324	64,719	622,179	591,660
SouthWest Area	65,067	60,886	553,981	532,807
East Area	58,896	55,051	464,027	453,769
NorthWest Area	56,410	50,748	501,003	466,834
Near West Area	20,919	21,148	216,440	204,491
NorthEast Area	289	295	2,143	1,997
Totals:	270,905	252,847	2,359,773	2,251,558

Bookmarks store frequently used views.

Toolbar buttons and other controls provide quick and easy access to analyses and functions.

The **Measures** panel lets users control the measures displayed.

i-Minder®

i-Minder delivers nearly identical 32-bit SIM access to UXT intelligence over an Intranet or Internet connection by opening a virtual window in a web browser. Like WebView, i-Minder runs over an Internet connection. However, unlike WebView, i-Minder requires a small application or “plug in” to run in a virtual window. i-Minder may not be available on all devices or in all security configurations.

Customized Web Dashboards and Widgets

Salient can create customized dashboards of your organization’s key business indicators. Like Salient WebView, widgets and dashboards are available in the user’s web browser and communicate with the UXT Server through a secure web application. So, users can connect and view vital information over an Internet or Intranet connection. Salient dashboards are completely customized to present unique information from within your company’s web site, portals, or other web pages. For example, highlight unusual results or show color-coded graphics for a quick glance at overall performance.

Load & Go™

Load & Go allows users to “load” a section of the UXT database on their computers and then “go” mobile. The resulting database is fully functional from anywhere, without any Internet or network connection. Users view and query the data through the SIM application.

In addition to SIM, the user machine requires the Salient UXT Server and Load & Go Client, which are provided in a simple installation. A Load & Go Replication Server also must be installed on a corporate server to manage and optimize requests from user machines.

Once installation is complete, users can run the Load & Go Client over a network or Internet connection to load data on their machines. Load & Go selectively grants access to different parts of the database to provide a customized, fully-secure system.

The user can then run the UXT Server and SIM locally for a complete, stand-alone solution. No Internet connection is required.

Data updates are easy. Users reconnect over a network or Internet connection and get the latest information in just a few clicks. Load & Go automatically determines exactly which information the users need.

About Salient

Salient Corporation offers business and government a new solution for efficient management. Drawing on diverse data from multiple sources, our technology measures how business activity creates value, quality, financial efficiency, productivity, while its user interface eliminates barriers to the use of this knowledge for continuous process improvement.

Salient’s technology platform is a super scalable in-memory OLAP system for activity based value scoring. Its user interface is a graphical toolbox for interactive, stream-of-thought data mining, visualization and root cause analysis. Overall, the technology enables non technical knowledge workers to evaluate process behaviors rapidly, eliminate waste and optimize outcomes continuously.

Founded in 1986, Salient today serves more than 35,000 users in 53 countries. For more information, visit www.salient.com.
