

Salient Performance Management Hits the Road

Every day, Salient Performance Management provides business professionals with the vital information needed to make important decisions, but sometimes busy users don't have the time or the means to connect to the corporate server or Internet. That's why Salient created the Load & Go™ Mobile Data Analysis Utility. From representatives in the field to executives away on long trips, Load & Go users can "load" any section of the master database on nearly any computer and "go" mobile, without any network or Internet connection.

Fast Start-Up: Load & Go takes just a few minutes to install and run, providing a fully-functional system (including customized database, Server, and Minder Viewer client) on nearly any machine.

Full Mobility: Once the database is "loaded", users can run the Salient Management system anywhere...at home, in a car, on an airplane...without any access to the Internet.

Customized, fully-secure data access: Load & Go selectively grants access to different parts of the database. For example, provide the regional manager information about his region, grant an executive access to the whole database, give sales people access to sales data while restricting cost of goods sold and margins.

Easy remote synchronization: The latest information is just a few mouse-clicks away, over nearly any network or Internet connection. Load & Go does all of the work, determining exactly which information the user needs.

About Salient

Salient Corporation offers business and government a new solution for efficient management. Drawing on diverse data from multiple sources, our technology measures how business activity creates value, quality, financial efficiency, productivity, while its user interface eliminates barriers to the use of this knowledge for continuous process improvement.

Salient's technology platform is a super scalable in-memory OLAP system for activity based value scoring. Its user interface is a graphical toolbox for interactive, stream-of-thought data mining, visualization and root cause analysis. Overall, the technology enables non technical knowledge workers to evaluate process behaviors rapidly, eliminate waste and optimize outcomes continuously.

Founded in 1986, Salient today serves more than 35,000 users in 53 countries. For more information, visit www.salient.com.

How it Works

Installed on a corporate server, the Load & Go Replication Server manages and optimizes requests from client machines. Any number of users can quickly load information through a local area network (LAN), wide area network (WAN), or dial-up connection, either directly or through a port in the corporate firewall.
