Web Software Engineer – Multiple Levels Available

Recognized for more than 25 years of growth in visual data mining technologies, Salient delivers a lightning-speed solution that empowers people and impacts business at all levels. As an industry leader, we attribute our success to our cutting-edge technology and to the contributions of our dedicated, forward thinking employees.

We offer a fast paced work environment. We focus on the professional development of all employees. As part of our generous compensation package, Salient offers paid time off between Christmas and New Years. We foster open communication and are committed to a team oriented environment.

We are seeking software development professionals who are interested in using their skills and creativity to solve complex problems and implement new features in our enterprise software suite. Candidates should be able to come into an existing code base and improve upon what has been created. These full-time positions will be located in Horseheads and Albany NY.

Development would be primarily for a multi-tiered web application on a Microsoft technology stack using a variety of programming languages (HTML5/JavaScript/ASP.NET/C#/C++).

While prior experience with specific technologies is not required, candidates would be expected to learn new technologies, languages, and frameworks as applicable to perform their duties. Well-qualified candidates would be able to apply their problem-solving skills in a variety of situations, from UI/UX design, to codebase maintenance, to end-user support and debugging.

Our company is well established and growing. We are looking for motivated employees to grow with us.

To perform this position successfully, an individual must be able to perform each essential duty satisfactorily. The requirements listed below are representative of the minimum knowledge, skills and/or abilities required.

Education/Experience
- B.S. (M.S. preferred) in Computer Science/ Mathematics

Primary Duties & Responsibilities:
- Collaborate with peers to find solutions to programming problems that improve performance of the program and maintainability without regard to ownership of the solution.
- Discuss and define the goals of the system.
- Design and create the objects that are used to create applications.

Technical Skills
- C++
- C#
- HTML5
- JavaScript
- ASP.NET

Preferred Skills or Knowledge
- Advanced problem solving skills
- Ability to work in a team setting

Salient Corporation is proud to be an Equal Opportunity Employer.

All qualified applicants will receive consideration for employment without regard to race, color, religion, creed, sex, sexual orientation, marital status, military status, veteran status, age, national origin, citizenship, ancestry, disability, predisposing genetic characteristics, domestic violence victim status, or any other status protected by law.

In compliance with federal law, all persons hired will be required to verify identity and eligibility to work in the United States and to complete the required employment eligibility verification document form upon hire.
