Senior Web Software Engineer

Recognized for more than 25 years of growth in visual data mining technologies, Salient delivers a lightning-speed solution that empowers people and impacts business at all levels. As an industry leader, we attribute our success to our cutting-edge technology and to the contributions of our dedicated, forward thinking employees.

We offer a fast paced work environment. We focus on the professional development of all employees. As part of our generous compensation package, Salient offers paid time off between Christmas and New Years. We foster open communication and are committed to a team oriented environment.

We are seeking an experienced software development professional to use their creativity to solve complex problems and implement new features in our enterprise software suite. Candidates should be able to come into an existing code base and improve upon what has been created. Senior team members are required to mentor existing and new team members. This full-time position will be located in Horseheads, NY.

Qualified candidates will meet one of the following descriptions:
- An experienced application developer with a deep understanding of high-performance multi-threaded IIS web applications written in C#.NET. This developer can analyze existing code and create new code with a focus on performance in a multi-user environment. This developer should also be comfortable working with JavaScript and HTML when required.
- An experienced web designer / developer with proven skill for creating responsive and intuitive UIs with complex feature sets. This developer has experience with object-oriented JavaScript development (Sencha/ExtJS framework experience a plus) and is fluent in HTML5 and CSS3 (SASS/SCSS a plus). He/she should also be comfortable working with back-end response generation in C# when required.

Development would be primarily for a multi-tiered web application on a Microsoft technology stack using a variety of programming languages (HTML5/JavaScript/ASP.NET/C#/C++).

Our company is well established and growing. We are looking for motivated employees to grow with us.

To perform this position successfully, an individual must be able to perform each essential duty satisfactorily. The requirements listed below are representative of the minimum knowledge, skills and/or abilities required.

Education/Experience
- B.S/M.S. in Computer Science/ Mathematics
- 5-10 years of experience

Primary Duties & Responsibilities:
- Collaborate with peers to find solutions to programming problems that improve performance of the program and maintainability without regard to ownership of the solution.
- Discuss and define the goals of the system.
- Apply principles and techniques of computer science, engineering and mathematical analysis to the development and testing of computer programs.
- Research and recommend new trends in technology.
- Design and create the objects that are used to create applications.

Technical Skills
- C++
- C#
- HTML5
- JavaScript
- ASP.NET

Preferred Skills or Knowledge
- Advanced problem solving skills
- Ability to work in a team setting

Salient Corporation is proud to be an Equal Opportunity Employer.

All qualified applicants will receive consideration for employment without regard to race, color, religion, creed, sex, sexual orientation, marital status, military status, veteran status, age, national origin, citizenship, ancestry, disability, predisposing genetic characteristics, domestic violence victim status, or any other status protected by law.

In compliance with federal law, all persons hired will be required to verify identity and eligibility to work in the United States and to complete the required employment eligibility verification document form upon hire.
