Primary Duties & Responsibilities:

- Develop software design documents for requested features
- Develop, test, and maintain high performance software
- Act as a mentor to other engineers and lead development on multi-person
- Research/develop prototype features
- Manage time effectively and handle multiple assignments concurrently

Required Skills or Knowledge:

- Experience in algorithm design and development
- Attention to detail
- Knowledge of Agile and Kanban principles
- Experience using performance profiling tools
- Excellent communication and time management skills
- Ability to work in a multi-site team setting

Technical Skills

- C++
- Object Oriented Programming
- MFC, C, STL
- Design Patterns
- Visual Studio

Salient Corporation is proud to be an Equal Opportunity Employer.

All qualified applicants will receive consideration for employment without regard to race, color, religion, creed, sex, sexual orientation, marital status, military status, veteran status, age, national origin, citizenship, ancestry, disability, predisposing genetic characteristics, domestic violence victim status, or any other status protected by law.

In compliance with federal law, all persons hired will be required to verify identity and eligibility to work in the United States and to complete the required employment eligibility verification document form upon hire.
