# Care Management Program

If you are looking for a seamless, and fully synchronized, patient care experience spanning full episodes of care, Salient Healthcare's care management module supports patient management and activation.

Integrate data from multiple sources, including your EHR, HIE, and claims in order to help with risk stratification of patients and identify high-risk, high-utilization patients who will benefit most from care management interventions. Care managers will be able to review easy-to-use, prioritized worklists for patient outreach.

## For your care coordination activities:

- Manage resources and distribute workloads for care coordination activities

- Utilize standard care plans and assessments or customize your own

- Engage effectively with patients using reminders

| Data Integration | Patient Identification / Risk Stratification | Care Coordination / Management | Performance Management |

## Performance Management Augmented with Data Analytics and Reporting
Use the Salient Solution to analyze trends and discover a true ROI.

## This package includes:

- Quality program management and workflow automation
