Leverage Store-Level Chain Sales Data

Salient Pre-Packaged Analyses and Templates for CPG

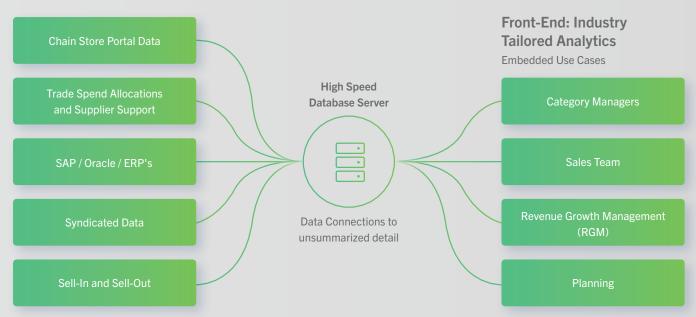

With more than 35 years serving the consumer goods market, we understand your industry.

Salient has built connectors to store sales data from major chains, including Walmart, Kroger, Target, Walgreens, and others. We consolidate this sales data with other sources, including ERP data, trade spend allocations, sell-in and sell-out information, and more.

We then apply our industry-tailored analytics to produce amazing insights for your business.

Inbound Connectors

Analytics Tailor-Made for Suppliers

Salient enables consumer goods suppliers to leverage store-level sales data to identify opportunities to increase sales and grow the business. Our industry-tailored analytics help suppliers achieve the best possible margins, identify potential voids, measure their true customer value after trade spend and promotions, and more.

Salient's solutions and services solve challenges specific to the consumer goods industry. Our platform provides you with the right balance of guided analysis and ad hoc discovery, going well beyond the capability of generic business reporting tools. That's why some of the world's most effective organizations work with us to solve their most challenging business issues.

Who We Work With

Achieve Best Possible Margins

Identify Product Voids

Avoid Inventory Shortages

Measure Price Effectiveness

Ensure Successful Product Launches

Measure True Customer Value

"This year, we are adding about 40-50% to our bottom line. I strongly believe that our work with Salient is a key contributor to that growth."

Marcus Franke Director of Business Transformation, CCEAG (**Coca-Cola of Germany**)

Types of Challenges We Solve

Leverage Store-Level Sales Data

Salient provides consumer goods suppliers with store-level sales data you can trust. This foundational knowledge helps you better collaborate with your retailers and distributors. Managers use Salient to identify sales opportunities in several ways:

- Identifying price effectiveness after inflation and supply chain fluctuations
- Finding potential voids and **perfect store** product mix gaps
- Tracking forecast accuracy
- Measuring true customer value after trade spend and promotions
- Revenue Growth Management (RGM)
- Collaborate Planning, Forecasting and Replenishment (CPFR)
- Sell-In aligned with Sell-Out

Collaborate with Retailers and other Sales Partners

With **Salient**, suppliers of consumer goods can improve collaboration. The insights you gain through our application portals help you achieve better outcomes:

- Improving deal terms with national chains
- Boosting store-level execution
- Identifying market segments that you can better develop

77

For Suppliers like Unilever, Salient's applications are leveraged for coaching and collaboration with distributors to strengthen deal terms with national chains, improve storelevel execution, and identify market areas to better develop.

Head of Client Services, Salient

Types of Challenges We Solve

Model Price Scenarios

Salient provides "what-if" scenarios to determine how much to offset pricing after supply chain cost increases. You can also monitor elasticity changes and project margin after swings in price and demand.

Measure the Impact of Inflation

Salient helps you model the impact of price increases on profitability, taking into account your current and projected costs. Wondering why margins are up or down? We provide cause-ofchange reporting to understand the true impact of price, cost, and demand on margins.

Identify Prices that Maximize Margins

Salient includes revenue growth management (RGM) capabilities. These tools help you obtain the highest margins possible. Here's how:

- Analyze promotions and pricing
- Identify pricing ranges and outliers
- Understand and track demand elasticity
- Compare competitor prices
- Share your analysis with custom reporting

77

"Salient's solution helped cut costs by nearly 3 cents per case. With 55 million cases shipping a year, that's an annual savings of \$1.25 million!"

Derek Hill V.P. of Corporate Planning, **Pepsi** Bottling Ventures

Enable Your Category Managers

Salient continues to develop solutions that enable category managers to excel at their job. We drill deep to understand price, promotion, store, and SKU-level sales detail.

Avoid Inventory Shortages

Suppliers can't afford to lose value due to execution issues along the supply chain. Our inventory analysis templates help managers determine the frequency and value of potential shorts and out-of-stocks. Suppliers can view product and customer data at different levels of focus – by channel, market area, chain, supplier, brand, package, and even SKU.

77

"It's very, very simple for field sales people to use. It's not only quick – these guys don't have a lot of time – but it's really very user friendly and that's really important."

Dean Aiello Director of Finance Bimbo Bakeries USA

Salient is a proud member of the Category Management Association (CMA), Shopper Insights Management Association (SIMA), and Category Management Knowledge Group (CMKG). Our implementation team is trained by CMKG and continues periodic training in category management. This ensures that we integrate category management thought leadership expertise and best practices into our training and software capabilities.

Our Technology

Salient integrates with SAP, Oracle, and other systems often used by consumer goods suppliers. We hook into the data you already have to provide interactive root cause analysis. The Salient highspeed query server brings in the raw, unsummarized, line-item detail of transactions. It then aligns that data with off-invoice supplier funding, financial allocations, databases of labor, and cost tables to provide a comprehensive picture of performance at high speed.

Pre-Defined Exception Criteria

As part of our setup process, a business analyst reviews your data and defines exception criteria. By applying common industry scenarios, we can pre-define and precheck the system. Then we provide a round of adjustments based on your unique business rules. Exception criteria include:

- New customers
- Lost customers
- At-risk customers
- Under-performing customers
- Distinct customers who bought something
- New placements
- Lost placements
- At-risk placements
- Same store sales
- Under-performing products

Your Data Integration Partner

Regardless of where you are on your data integration journey, **Salient** can add value. We can deliver a roadmap for creating a repository of valuable storelevel sales data. If you need help putting together a downstream database of store sales, we can set up connectors to most chain portals. If you do scan-based trading or sell on consignment, we have easy methods for parsing EDI records. And if you already have a store sales database built by another partner, we can layer our analytics on top of that database.

Analysis-as-a-Service for Suppliers

Salient offers optional services to extend the power of our solution further. Our goal is to help ensure healthy profits and continuous improvement for your organization. **Salient** provides custom solutions that help you tackle challenges unique to your business category management, inventory and other business processes.

Analysis-as-a-Service

Salient can help address analytical challenges unique to your business in category management, inventory, and other business processes by providing custom solutions that help augment the capabilities of our base product. We can perform projects based on your specific data requests and parameters. Salient also offers analytical studies performed by our consultants for a third-party perspective on your business performance. Some of our most requested custom insights include:

- Voids in chains on core products which can incorporate 'authorization' rules
- Lost placements with removal of inactive / discontinued items
- 'At risk' distribution before it's lost
- New product execution
- Placement voids & revenue opportunity
- Benchmarking to peers
- Promotion and coupon effectiveness
- Category performance review

Category Managment Foundation

Salient continues to develop tools and capabilities to enable category managers to leverage best practices, utilizing standards defined by the Category Management Association and CMKG.

Example Out-of-the-Box Insights

Salient delivers a wealth of insights through our industry-specific dashboards and reports. You can then drill down further into the data to answer any questions you may have about that information.

Store Level Cross-Selling Opportunities

Identify potential voids for any customer or product group.

Retailer and Distributor Estimated Profit

Prepare for fact-based pricing reviews with trading partners. For example, you can align supplier profit share vs. estimated distributor or retail profit share. Compare results when partners use recommended pricing versus the actual price to consumer (PTC). Suppliers who need PTC data often use eCommerce price scraping methods.

Compare sell-in vs. sell-out to align shipments with retail sales.

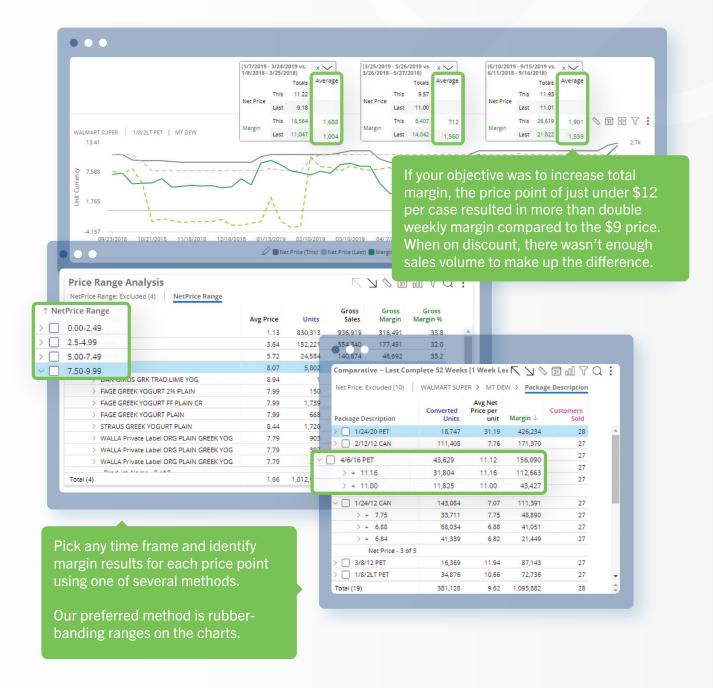

Compare retail profit margins versus supplier and wholesaler profit margins

Example Out-of-the-Box Insights

Price Optimization

Salient lets you view trends on items within major chains. Consumer goods suppliers can easily identify how each price point impacts short-term and long-term margin results. You can view this information during the current range or versus a year ago. **Salient's** unique rubber-banding interaction identifies the average weekly margin to compare against the results of each price point.

Margin Impact of Price and Cost Fluctuations

Your reports may identify changes in margin, but Salient tells you why they changed. Use our cause-of-change analysis to measure the impact of price and cost fluctuation. We isolate changes in cost of goods sold, price, and demand between periods. You can compare these measures across any two time periods in any part of the business. Now consumer goods suppliers know how to respond to margin fluctuations.

Example Out-of-the-Box Insights

New Product Execution

Measure rate of introduction, trial, and retrial to track both sales execution and product lifecycle. Know whether you should de-list an item or continue to push it based on how many people have purchased once and never re-bought or never purchased at all.

Automated Suggestions

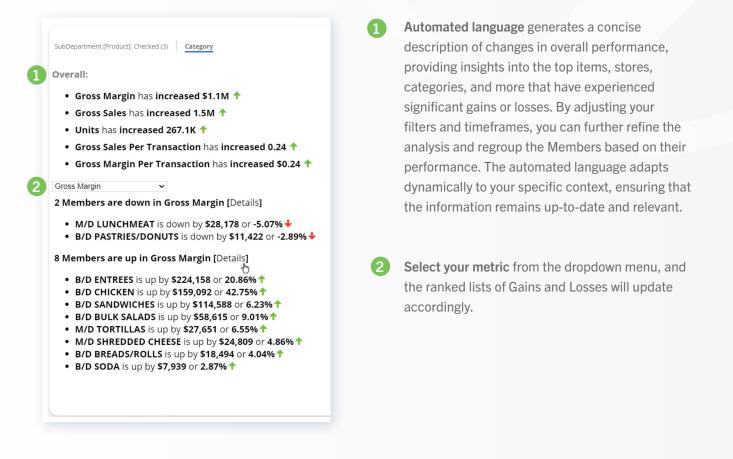

Salient offers automated storytelling findings using business rules that identify areas for improvement. The rules are customizable to help with analytical insight. The directional recommendations are easy to understand and highlight what your team members should notice and why.

Custom Dashboards

Tailored to Your Industry and Business

Every business is different. We can customize our existing visuals and reports to fit your unique needs. Below are some examples of custom dashboards we've built for suppliers.

77

"Salient sets us apart from our competition and lets us create a partnership with our customers. Instead of, 'Hey, I want to sell Coca-Cola,' it's, 'I want to grow your business, and this is how I can do it.' That's something our competition is not doing."

Bryan Robertson Commercial Capabilities Manager, **Coke United**

3 View department performance in a Heatmap by Store. In this example, all departments show positive growth in Sales, indicated by the gauges across the top row. The heatmap provides a more detailed view and highlights significant drops within specific stores. Store 12 is experiencing a significant loss in Sales in the Meat Department. Let's drill into that further and compare items.

4 We've drilled into Store 12 and can immediately see that a number of items are down in Sales in the Steaks Category. We can see how Volume, Transaction Counts, and Margin are also impacted and then **determine adjustments in our pricing** and assortment at this store.

Store 12: Category Trend - Year to Date vs. YAG

Effective Data-Driven Performance Across CPG, Retail, and Healthcare

Salient transforms complex data into actionable insights using industry-specific analytical solutions. **Salient's** solutions are more than just products – they are comprehensive, industry-specific packages designed to drive continuous performance improvement.

Our Solutions

Salient's comprehensive solutions are designed to tackle the specific obstacles facing CPG Suppliers. Harness the power of retail chain portal data, cost information, e-commerce insights, and labor metrics to enhance operations and decision-making. Optimize pricing, track inventory, and leverage retailer portals effectively. Ideal for food marketers, beverage suppliers, and other CPG segments. Here's why:

- Category management enablement
- Track new product penetration and retrial
- Leverage Walmart, Kroger, Ahold and other chain portals

Our Platform

Salient has engineered an innovative platform that revolutionizes data-driven decision-making. Our solution transforms complicated data into userfriendly information, empowering swift, informed decisions. Here's how:

- Combine data without pre-summarization
- Comprehensive data and user management utilities
- Leverage across desktop, web, or mobile devices
- Flexible deployment provides a scalable platform for future growth

Our Technology

Salient seamlessly integrates with your existing systems, tapping into your databases to unlock the full potential of your data. The **Salient** high-speed query server retrieves detailed, unsummarized transaction data, aligning it with off-invoice supplier funding, financial allocations, labor databases, and cost tables. This comprehensive analysis empowers you to conduct root cause analysis and gain valuable insights into performance rapidly and efficiently. Here's how:

- Scales to billions of unsummarized detailed sales transactions
- Runs on standard Windows commodity Servers
- Flexible management options: on-premise or self-hosted with Salient remote managed services
- Hosted and fully managed by **Salient** on your choice of MS Azure or AWS with pass-thru pricing on the hardware hosting charges

Connectors to Chain Portals

Analysis-as-a-Service

Salient helps address your business's specific analytical challenges in areas such as category management, inventory management, and other key business processes. We offer customized solutions that enhance the capabilities of our base product to address your unique needs.

Our team can undertake projects based on your specific data requirements and parameters, providing tailored insights. Additionally, we offer analytical studies conducted by our consultants, providing an external perspective on your business performance. Some of our most sought-after custom insights include:

- Space optimization/best product mix
- Benchmark analysis
- Competitor sales comparisons
- Voids and out of stock exceptions/alerts
- Key Account and Chain Reviews

Interested in how **Salient** can improve your company's sales and profitability?

Schedule an exploratory call so we can learn about your unique needs.
