

Web Software Engineer
REMOTE POSITION

Recognized for more than 30 years of growth in visual data mining technologies, Salient delivers a lightning-fast solution that empowers people and impacts business at all levels. As an industry leader, we attribute our success to our cutting-edge technology and to the contributions of our dedicated, forward thinking employees.

Our company is well established and growing. We are looking for motivated employees to grow with us.

We offer a collaborative remote work environment and focus on the professional development of all employees. We foster open communication and are committed to a team-oriented environment. As part of our generous compensation package, Salient offers paid time off between Christmas and New Years.

We are seeking an experienced software development professional to use their talents to architect and implement new features in our enterprise software suite. Candidates should be able to understand an existing code base and improve upon it. Solid debugging and analysis skills are a must.

Our main development focus is for a multi-tiered web application on a Microsoft technology stack primarily using React.js, ASP.NET, and C# programming languages.

Qualified candidates should have experience:

- Developing front-end MVC or MVVM code with React.js. Angular or Vue experience with a desire to learn React.js will also be considered
- Following software design patterns to produce well-organized, logical, efficient, and maintainable code
- Creating test-cases and/or unit tests
- Working independently and within multi-person development projects
- Estimating implementation time for user stories and/or feature requirements, and scheduling work to meet fixed deadlines

Education/Experience

- B.S. in Computer Science (or related field)
- 4-6+ years of front-end programming experience (full stack preferred)
- Strong understanding of MVC and object-oriented development patterns

Primary Duties & Responsibilities:

- Collaborate with peers to devise and implement solutions to programming problems that improve performance and maintainability of the systems
- Architect solutions that fit within yet enhance the existing code base
- Apply principles and techniques of computer science, engineering and mathematical analysis to the development and testing of computer programs

Technical Skills

- React.js
- ASP.NET
- C#
- HTML5
- JavaScript
- Git

Preferred Skills or Knowledge

- Advanced problem-solving skills
- Leadership and mentoring
- Performance optimization
- Mobile app development experience
- Jira
- CI/CD
- Experience working in an Agile environment

Salient Corporation is proud to be an Equal Opportunity Employer.

All qualified applicants will receive consideration for employment without regard to race, color, religion, creed, sex, sexual orientation, marital status, military status, veteran status, age, national origin, citizenship, ancestry, disability, predisposing genetic characteristics, domestic violence victim status, or any other status protected by law.

In compliance with federal law, all persons hired will be required to verify identity and eligibility to work in the United States and to complete the required employment eligibility verification document form upon hire.
